

Manrex Limited® offers many different styles of dispensers to meet the many different needs of patients in their home. All of our medication dispensers are designed to simplify and improve medication compliance.

Many of these devices provide a simple and cost effective alternative medication delivery system in assisted living facilities.

### Medicase®

The MediCase® is an innovative approach to medication compliance in the community care setting. Designed with a protective lid, as well as tamper evident security seal, the MediCase® is easy to use; simply push on the seal to release the medications from their cup. No more spilled medications associated with hard, plastic boxes with sliding retainers.

The MediCase® is lightweight, easily transported and disposable so there is no risk of cross contamination or ending up with dirty containers. The individual dosage times are larger and deeper than most blister card systems allowing for greater medication storage capacity and the security seal keeps all the medications contained within their med-cup. The MediCase® is an ideal medication compliance device for the active elderly who take several medications, but need to do so on the go.

#### Medicase 28 Dose
