

# Find Prescriptions Faster with HangRx Pick to Light!

**In a busy pharmacy, the last thing you want to have to do is find a prescription that's gone missing or have clients waiting while your team searches through drawers or bins looking for completed orders. The busier the pharmacy the more common the problem becomes.**

***We can help!***

HangRx is a Pick-to-Light system that quickly identifies where a client's prescriptions are located. Developed from a hanging bag concept, but with the added benefit of a lit handle, HangRx makes finding completed scripts fast and easy... just follow the lights! Using IR (Infra-Red) technology, the same dependable technology as a TV remote or Garage Door opener, the HangRx system is simple, reliable and can be installed quickly and inexpensively.

HangRx will make your dispensary less stressful for your staff and more convenient for your customers, all while saving time and money.

**Promoting health by preventing error.**

requirements.

## Easy to Use:

The system is simple and easy to use with only two scans! Scan the Rx and scan the HangRx bag and they are linked. Hang it up and the process is done.

## Easy to Find:

Finding bags is easy... select the patient, click find and all the bags linked to that patient light up! With coloured light options, multiple pharmacy techs can retrieve multiple patients without wondering which bags they are looking for. No more searching for misfiled, overlooked or missing Rx's!

## Key Features:

- Each bag has a unique bar code
- Up to 35 light combinations for multiple users
- Handles powered by two (2) watch batteries
- Two bag sizes made of heavy duty 18 mil plastic

## Immediate Benefits for the Pharmacy:

- Locating prescriptions drops from an average of 2 to 3 minutes to less than 30 seconds
- Multiple techs can retrieve at the same time
- Ability to bundle at time of dispense
- Product recalls highlighted immediately
- Return to stock in minutes not hours
- No overlooked prescriptions
- No incorrect provision due to name errors
- Happier staff, greater team retention
- Happier customers, greater customer retention

## Immediate Benefits for the Customer:

- Significantly reduced wait times
- Fewer omitted prescriptions
- Increased safety (fewer similar patient name errors)
- Text or Voice Mail notification of Rx availability for pick up (Optional)
